DATE:

HTTP GET AND POST METHODS

AIM:

To write a servlet that demonstrate the difference between HTTP POST and GET methods by creating a form and handling requests accordingly.

PROGRAM:-

Signup.html

```
<!DOCTYPE html>
<html>
<head>
<meta charset="UTF-8">
<title>Insert title here</title>
</head>
<body>
<h1>SIGNUP</h1>
<form action="/Janani_V_R_65/SignUp" method="post">
<label for="fname">FIRSTNAME:</label>
<input type="text" id="fname" name="fname" placeholder="Enter FirstName"
required/><br><br>
<label for="lname">LASTNAME:</label>
<input type="text" id="lname" name="lname" placeholder="Enter LastName"
required/><br><br>
<label for="dob">DOB:</label>
<input type="date" id="dob" name="dob" placeholder="Enter DOB" required/><br><br>
<label>GENDER:</label>
<input type="radio" id="male" name="gender" value="Male" required/>
<label>Male</label>
<input type="radio" id="female" name="gender" value="Female" required/>
<label>Female</label>
<input type="radio" id="other" name="gender" value="Other" required/>
<label>Other</label><br><br>
<label for="address">ADDRESS:</label>
<textarea id="address" name="address" rows="4" cols="40"
required></textarea><br><br>
<button type="submit" >SIGNUP</button>
</form>
</body>
</html>
```

SignUp.java

```
package com.janani.servlet;
import java.io.IOException;
import javax.servlet.ServletException;
import javax.servlet.annotation.WebServlet;
import javax.servlet.http.HttpServlet;
import javax.servlet.http.HttpServletRequest;
import javax.servlet.http.HttpServletResponse;
import java.io.PrintWriter;
@WebServlet("/SignUp")
public class SignUp extends HttpServlet {
    private static final long serialVersionUID = 1L;
```

```

    public SignUp() {
        super();
        // TODO Auto-generated constructor stub
    }

    protected void doGet(HttpServletRequest request, HttpServletResponse
response) throws ServletException, IOException {
        // TODO Auto-generated method stub
        response.getWriter().append("Served at:
").append(request.getContextPath());
    }

    protected void doPost(HttpServletRequest request, HttpServletResponse
response) throws ServletException, IOException {
        String fname= request.getParameter("fname");
        String lname= request.getParameter("lname");
        String dob= request.getParameter("dob");
        String gender= request.getParameter("gender");
        String address= request.getParameter("address");
        PrintWriter p=response.getWriter();
        p.println("FirstName:"+fname);
        p.println("LastName:"+lname);
        p.println("DOB:"+dob);
        p.println("Gender:"+gender);
        p.println("Address:"+address);
    }
}

```

47     p.println("Gender:" + gender);
48     p.println("Address:" + address);
49 }
50
51 }
52
```

Servers Console

apache-tomcat-8.5.61 at localhost [Started, Synchronized]

Activate Windows
Go to Settings to activate Windows.

OUTPUT:

localhost:7751/Janani_V_R/signup.html

SIGNUP

FIRSTNAME:

USERNAME:

DATE OF BIRTH:

GENDER:

☐ Male ☒ Female ☐ Other

ADDRESS:

Activate Windows
Go to Settings to activate Windows.

RESULT:

Thus the servlet that demonstrate the difference between HTTP POST and GET methods by creating a form and the requests are handled successfully .
